

AVG Cloud Management Console

AVG Cloud Management Console is an easy-to-use online platform for businesses to manage all AVG Business solutions deployed in their networks. It provides real-time visibility of threats, comprehensive reporting, and management capabilities, all in a single platform.

Monitor threats from a single dashboard

Configure notifications based on specific device actions and monitor from a centralized dashboard for full transparency into individual device issues, as well as threats that might be spreading among connected devices.

Deploy unified, layered cybersecurity

Deploy, configure, and maintain AVG Business security services from a single cloud-based platform to help protect your data, endpoints, applications, and networks from malware and other cyberthreats – whether they originate from inside or outside the network.

Quick and easy setup

Choose an endpoint protection solution, set up the console, and assign your antivirus and patch management to your devices to help protect them from cyberthreats. Organize your devices into groups, create setting templates, schedule tasks, and remotely deploy antivirus - all from a single, intuitive dashboard.

Install updates quickly

Remotely download and distribute virus and program updates to managed devices from one console to save time and bandwidth.

Features

Single Dashboard

View all alerts at a glance, address issues, and get the insight you need to make informed security decisions and stop threats that might be spreading among managed devices. Add AVG Business services and quickly take action to increase uptime, stability, and security.

Device and Policy Management

Manage security for Windows devices with the Business Hub agent. Policy changes will automatically configure themselves on the agent-controlled devices in real-time, requiring less maintenance and making it easier to scale business operations.

Import/Export of Policies

Export or import policy configurations to the management console for backup purposes or transferring them between consoles. The exported file is encrypted and password-protected to prevent unauthorized access to security configurations and passwords stored within the policy.

Comprehensive Reporting

Generate and schedule easy-to-read, detailed activity reports with a few clicks. View reports that include blocked threats, task lists, protected devices, patch statuses, and more.

Services

AVG Antivirus Business Edition

Helps protect your endpoints, email and file servers your endpoints from ransomware, malware, and other advanced cyberthreats.

AVG Internet Security Business Edition

Helps protect your endpoints, email and file servers from ransomware, phishing, and other threats.

Patch Management

Stay ahead of vulnerabilities by identifying critical patches and easily deploying them across managed Windows endpoints from one dashboard.

Alerts & Notifications

Configure alerts for important issues that require your attention, and immediately send email notifications to affected parties, enhancing reaction time and minimizing exposure. Alerts and email notifications also include outdated antivirus applications, extended device inactivity, and other device updates.

Master Agent

Select a device as the Local Update Server, where all updates can be downloaded. Save bandwidth by scheduling and distributing updates to managed endpoints in your network when it's convenient.

Real-time Commands

Instantly apply remote commands across managed devices like scans, restarts, and more. Run commands automatically based on policy settings.

Network Discovery with remote deployment

Discover all devices connected to the networks you manage and remotely deploy AVG Business security services to endpoints you want to protect.

AVG File Server Business Edition

Helps protect business files and customer data on Windows servers.

AVG Email Server Business Edition

Keep your emails safer and running fast from server to desktop inboxes.
