Business Hub

Managed Security Platform for Businesses

The Business Hub is a powerful cloud-based platform for businesses to manage all Avast Business solutions deployed in their networks. It provides real-time visibility of threats, comprehensive reporting, and management capabilities, all in a single platform.

Monitor threats from a single dashboard

Configure notifications based on specific device actions and monitor from a centralized dashboard for full transparency into individual device issues, as well as threats that might be spreading among connected devices.

Multi-tenancy support

Easily manage multiple sites or locations and streamline the responsibilities across large teams. Multiple users can be created to allow access to a limited portion of the Business Hub.

Enterprise-grade security services

Our cloud-based endpoint protection and network security solutions provide a complete, in-depth defense against all forms of malware and other cyberthreats – whether they originate from inside or outside the network via email, websites, or the Internet.

Connect securely to any managed device

Use our free remote IT tool to connect securely to any device with the Avast agent installed and remotely resolve issues, perform tasks, reboot computers, transfer files, and chat with users.
Features

**Intuitive Dashboard**
View all alerts at-a-glance, address issues, and get the information you need to make informed decisions, add services, and take quick action to increase uptime, stability, and security.

**Device and Policy Management**
Manage security for all devices with the Business Hub agent. Policy changes will automatically configure themselves on the agent-controlled devices in real time, requiring less maintenance and making it easier to scale business operations.

**Detailed Reports**
Generate and schedule easy-to-read, detailed activity reports with the click of a button. View reports that include blocked threats, task lists, protected devices, patch statuses, and more.

**Notifications**
Receive instant email notifications on any security threats or network issues that need your attention, including outdated antivirus applications, extended device inactivity, and additional device updates.

**Update Agent**
Select a device as the Local Update Server where all updates can be downloaded. Save bandwidth by scheduling and distributing updates to all endpoints in your network when it’s convenient.

**Commands**
Quickly apply commands across devices like scans, restarts, and more. Run commands automatically based on policy settings.

**Network Discovery with remote deployment**
Easily discover your entire IT network and deploy Avast Business security services to all your endpoints in minutes to keep your business safe.

Solutions & Services

**Essential Business Security**
Avast Essential Business Security includes our award-winning antivirus to defend your customers against viruses, phishing, ransomware, spyware, zero-second threats, Wi-Fi network vulnerabilities, and more.

**Premium Business Security**
Avast Premium Business Security combines our award-winning antivirus with VPN and privacy tools to help your customers stay private and safe online.

**Ultimate Business Security**
Avast Ultimate Business Security combines our award-winning antivirus and our best privacy tools with patch management automation software to keep your customers devices and applications updated and protected.
Available as add-ons in the Business Hub

**Patch Management**
Stay ahead of vulnerabilities by identifying critical patches and easily deploying them across all endpoints.

**Premium Remote Control**
Connect securely to any device from any location to remotely resolve issues, perform tasks, reboot, transfer files, and chat with your users.

**Cloud Backup**
Keep data secure and ensure business continuity by protecting endpoint devices and servers with an automated backup process that is easy to deploy and manage from anywhere.

**Web Control (Coming in 2023!)**
